THE LATEST SCANDAL ABOUT THE COURT HOUSE

With the latest scandal that was created following a High Court ruling in Bogota, from the "returns to the palace," many researchers and supporters of the political reality of Colombia, gather items on

the causes of impunity on State crimes.

While in Colombia untouchable beings exist for justice, it will be the popular adage wise saying "the law is for the poncho." President Santos to former President Belisario Betancourt "is turning 90 years of serving the

country, 90 years to defend the culture, 90 years of promoting literature, 90 years of a life of public service" ... the problem is that this is not reading with many Columbus and his name popping the serious events of the Palace of Justice, one of the events where impunity reigns for almost 30 years and just the challenge of justice saw that page is dark and shameful criminal history of the Colombian state and its army.

That is why the public disavowal of President Santos, the court's ruling disqualifying of Bogotá, there can be less than disastrous for the Colombian justice perspective, because again it appears the "hairly hand" of executive power, crushing the other powers.

And the army that the president apologizes for not admire him more and he considers that justice is putting into question publicly, is the fulfilling presidential orders, set fire to the courthouse incinerated including the judges and then headed Colonel Plazas Vega, one of which must account for the missing of this ignominy.

In this army that the president apologizes is the same as for higher orders, formed and trained Colombian paramilitaries and made common cause with them in the thousands of massacres remain unpunished today.

With all certainty, President Santos, the millions of Colombians humble, whom the army were killed, tortured, disappeared

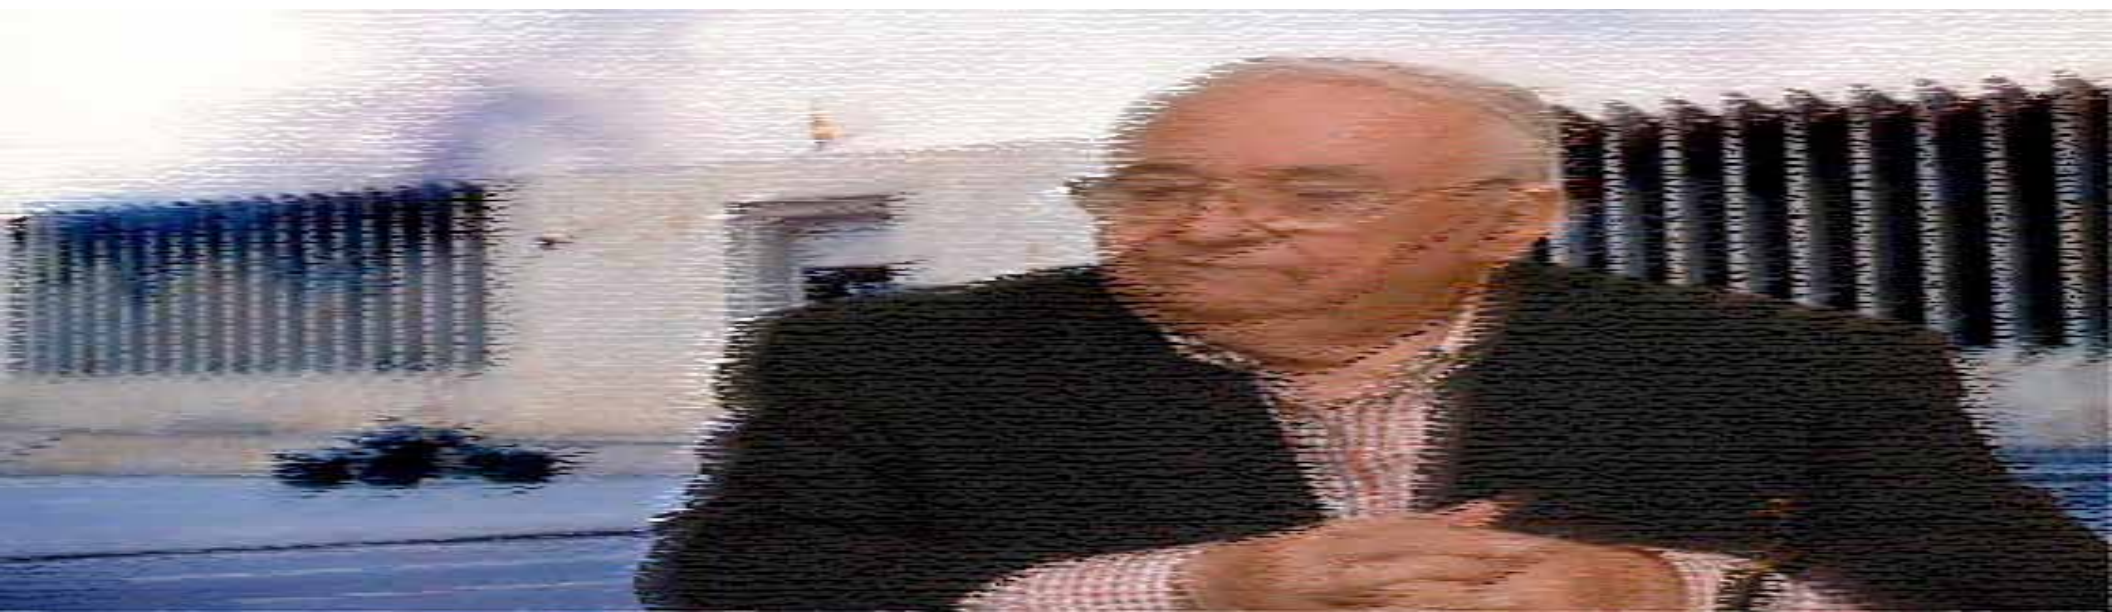

and displaced millions of innocent relatives or friends, never going to apologize and even less when it is clear that these practices are still portray throughout the country.

Instead, they join in chorus to the president, the other owners of power, because that army defended them as dogs. There is no doubt that President Santos will return in the stubborn defense and unpunished, all received favors and loyalties.

Is appropriate to emphasize that in these public statements by the president, not only is clear

that impunity cost of taking sides and trample the possibilities of justice, to state crimes and crimes against humanity, but projects a line guerrilla, resting on their rifles in clear contradiction with demagogic speeches alluding to democracy and away the possibility of Truth Justice and Reparation for victims.

Only the struggle of the people and the nation, with the fullest sense of unity, solidarity and understanding, you can put into perspective, a future of justice, peace and true democracy, as Colombia urgently needed.

CAMILO REUNION WITH LATIN AMERICA

Author: Northern War Front

To celebrate the 46th anniversary of the heroic death of Camilo Torres Restrepo, pivoted, his reunion with Latin America, for his contribution in the political, sociological, ethical and ideological consistency with what he thought and said, leads him to occupy a worthy place in the struggles waged by the continent for the sovereignty and socialism.

Camilo Torres was a leader in the struggles of the continent inspired guerrillas in Argentina, Priests for Socialism in Chile Allende supporters and popular guerrilla struggles and defeated the dictator Somoza in Nicaragua. Several analysts have noted that "end his rebellion and commitment made him a worldwide symbol of revolutionary insurgency."

At 46 years of his death in combat that February 15, 1966 in Cement Patio, the oligarchy and imperialism have not been able to silence his voice, nor erase the memory of our peoples.

The ruling class tries to avoid the struggles of the people are attached to the paradigm of thought and Buck, because he knows that he has a moral and spiritual force to be assimilated by the majority, the battle for socialism and ultimately independence is enhanced and strengthened.

A major task of the revolutionary, popular leaders, intellectuals, honest, and Christian Democrats, is to make America look for the reunion with the thought of Camilo. The Camilismo has much to contribute to new battles on the continent, especially now that the ideological struggle plays a decisive role.

You have to bet on the reunion with the sociologist Camilo, who wanted the unit to study and know the reality and transform it for the good of humanity. With the scientist who conceived of science and its development to serve man, not capital.

Latin America needs to be reunited with Connor Christian and priest who gave the revolu-

tion of love of neighbor. Camilo taught that one can not be Christian without being revolutionary.

Latin America needs to reconnect with Camilo social scientist and scholar, who gave the Latin American thought, as a pioneer of urban sociology and theology of liberation, the latter opened the way for Christians who are the majority of Latin Americans into the fight for socialism and sovereignty, while found in common with the other strands of socialist thought. At that meeting multiple, is one of the great contributions of Camilo.

Today that imperialism and the oligarchy, using all means to divide us so that we revolutionaries see different each other and fight us so scattered, it is necessary to take the call unit and throwing Camilo inviting the Venezuelan singer Ali Primera "because they come together, yeah, why if you joined the rifle and the gospel in the hands of Camillo."

The bet that block the formation of popular and revolutionary Camilo must ratify the anti-imperialist, the sociologist, the popular leader, scholar and guerrilla, who fulfilled his slogan to fight to the death for the interests of the majority.

THIEF JUDGE FOR YOUR CONDITION

Author: Juan Pablo Mosquera

For several decades, Colombian officials have been working on the thesis, to dirty the Democrats, popular and revolutionary fighters, so that people lose faith and confidence in the altruistic values that should be part of a society that aspires to live in justice.

Trashing the revolutionaries

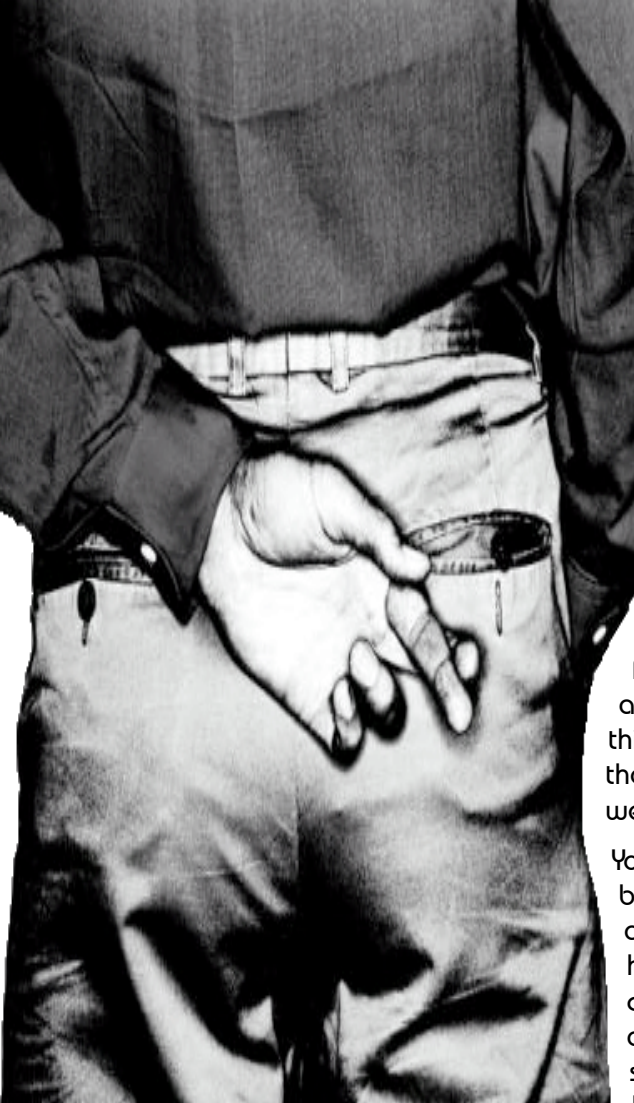

through slander, seeking to discredit the struggle that we develop for years, with the people, to change Colombia. Seek to leave the feeling in the village, we are all cut from the same cloth and walked down the path of the anti-values that characterized the ruling elite and there is no solution to the enormous problems of the nation because there is where to draw.

The Buck's death in combat in the ranks of the ELN does not constrain his legacy to the insurgency, Camilo transcends, is part of the Latin American heroes and thinkers, who devoted all for the future of new generations, that emerged of their

privileges and amenities, to sacrifice for a world of justice.

Today is the order of the day reunion with Camilo, popular in the battles of our continent, continued the fight started over five hundred years.

beyond their corrupt and dominated by the Mafia, by the profit motive and theft, there are no organizations that behave values and principle, governed by other parameters of life.

Mr. President, you said in recent days that the commander in an e-Mosquera, was instructed to urgently legalizing properties, farms, mines, housing and others according to this email are owned by the ELN, the lie falls apart weight and size.

You can not forget that by the end of 1998 and all that far this century, has been persistent and continuous, violent attack against communities in southern Bolivar, Colombia by two facts you must know, the first one

This is an old hobby of the rich, for those beyond their culture, their vision of a world given over to individualism, selfish habits and pettiness that concentrates wealth and lands in your hands leaving the dispossession and misery, million Colombians, no horizons.

The leaders believe that parties

is to have the sin of living in a territory rich in precious minerals like gold, which has aroused the envy of domestic and foreign groups for those who exploit them, is their goal and the population of the communities in that region of Colombia cute and beautiful, is an obstacle to be swept up and remo-

ved from the medium.

So the great massacres perpetrated by government armed forces, regular and irregular and the continued killings and torture of peasants and miners to cause them to stampede and take over those lands and territories that are communities of life and solidarity.

The second is that this region and its inhabitants, are accused of being subversive when the language of aggression is friendly, but more often is sindicarlos terrorists and under such signaling, which does not escape you have done Mr. President, is denied the right to own property that result from their work and effort.

This policy of sindicarlos also of helping the insurgency, which leads to snatch your property because they are illegal, they

snatch their small mines as illegal and snatch their properties are being criminalized.

If something did and continue to do all fairness ELN insurgents in all Colombian mining regions where we are, including the South of Bolivar, is to guide communities to resist and protect their common and individual property and not fall the weight of the Mining Code and the provisions of the current development plan, which empowers any police officer, that he seizes the grams of gold produced by small mining community.

It is undeniable continue, major operations of persecution and criminalization of the mining population of the country. It is a truth of a fist that the national government is preparing to outlaw the entire environment of small and medium gold production and facilitate the move-

ment of people, accusing it of front men, but that background has prepared the ground for the ruthless plundering of the transnational mining bulldozer energy, which will return a few years gold producing areas, such as a large open pit and desolate tunnel.

Aggression to people of all mining regions does not stop and there will always be the excuse made by the intelligence services.

Very nice it would be Mr. President that the country widely known the other side of the story, that of transparency, honesty, altruism, love and dedication to the cause of the dispossessed that inspires us and that is reflected in our next ac-

tivity of the population remain done for almost half a century.

That would be useful to the truth that the media and Colombia, knew all that the ELN insurgency has contributed to social and human development in the communities where we operate, but that was done in front of their communities. We are confident that the balance would be contrary to broadcast the State and the government that you manage, it would be enlightening to this reality is in contrast to the damage caused by the massacres, disappearances and torture, as well as bombings and displacements that have caused population, regular and irregular forces of their government.

THE ALBA ALWAYS REBORN

Author: International Front Milton Hernández

In the heat of the commemoration of the 20 years of civil-military rebellion on February 4 that led to the Bolivarian revolution came the eleventh summit of the Bolivarian Alternative for the Peoples of Our America.

The recent meeting of integration and the recovery of Latin American and Caribbean nationals interesting developments occurred in the process of continental liberation. But undoubtedly the political fact that the time frame was the proposal made by President Evo Morales of Bolivia Plurinational sister on the creation of the board of De-

fense of the member countries of Alba.

Yes, a new doctrine in defense of peace for the people and in defense of sovereignty, so threatened today by the realignment and strategic shift of U.S. imperialism (Asia-Pacific), to finalize the final assault on the world.

The interesting initiative arises the need to rebuild under a new anti-capitalist and imperialist military doctrine in which they promote the role of the armed forces serving the people and not the rule.

World Peace

American Imperialism is the more acute the crisis, it becomes more threatening and aggressive, the recent sanctions on Iran and Syria are sample cup of the race to nuclear militarism that promises unlimited grave danger to humanity new wars of aggression and plunder of national resources to over-

come the crisis of capital as at other times.

Self-Determination

Integration processes in the Latin American continent-by-step progress of giants, political outcomes, social, economic and political consequence of these efforts is reflected in the building to rebuild the ideals of independence, unity and regional integration as we will bequeath the heroes Nuestramericanos the likes of Bolivar, Marti and Sandino who played for independence the final and real self-determination of our people.

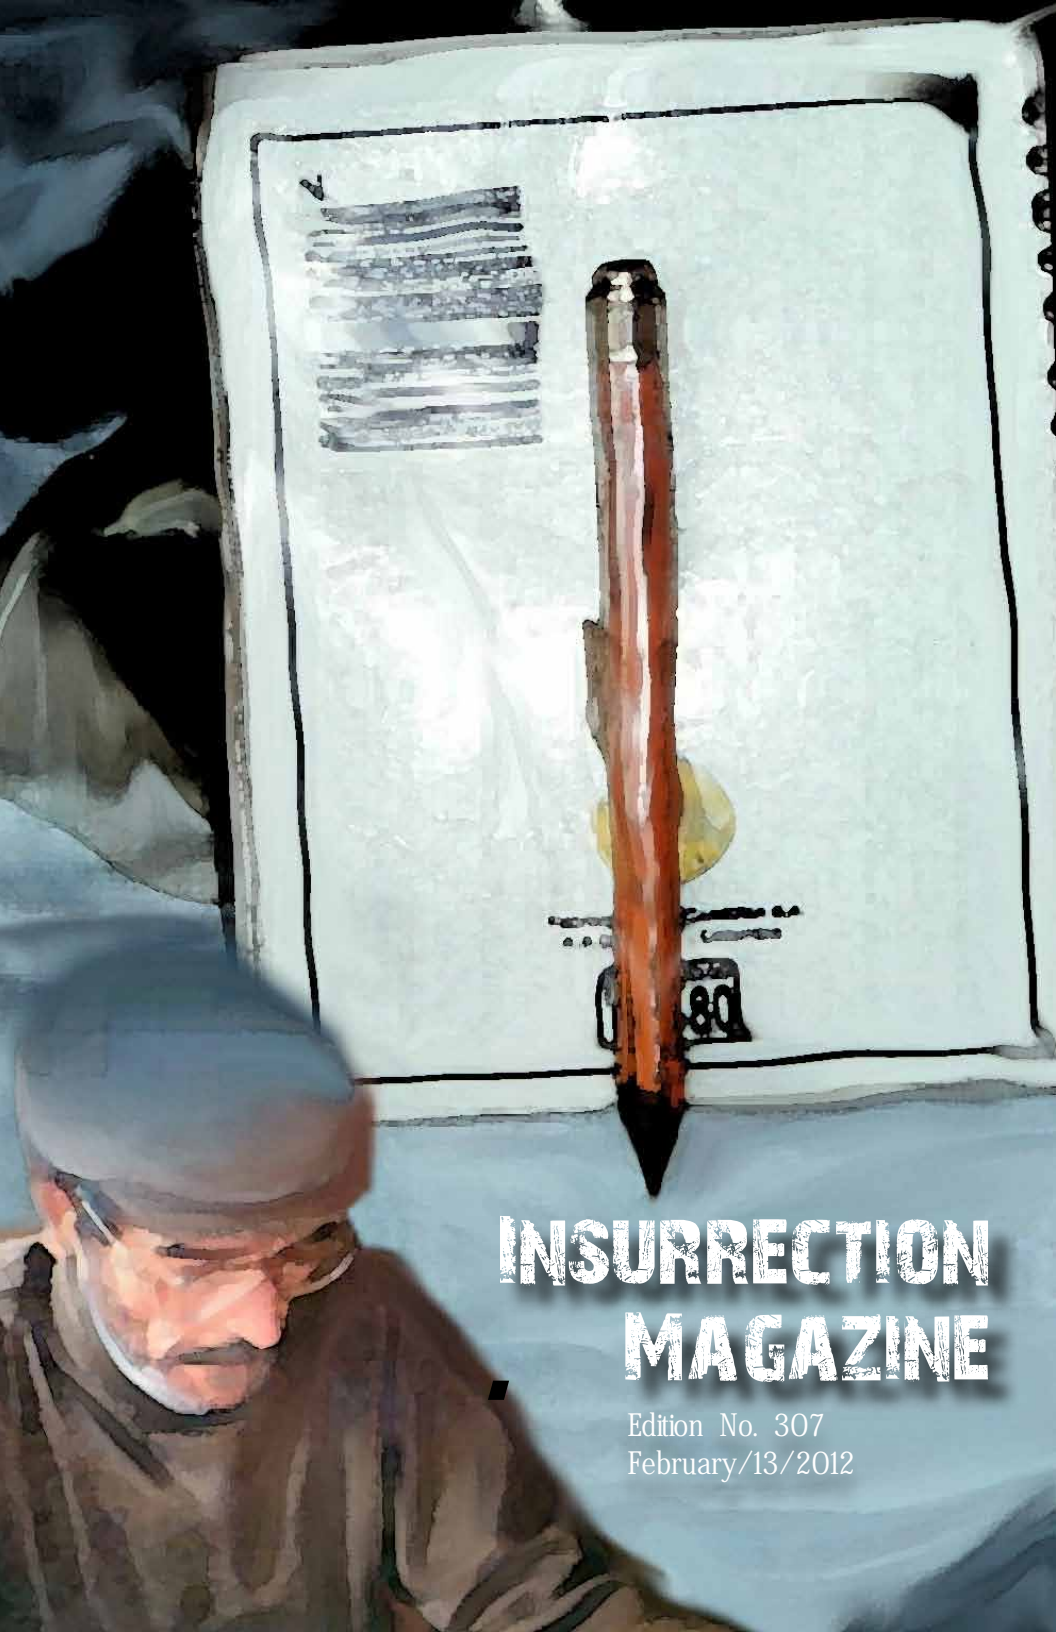

The regional integration block gets 2 new members countries like Saint Lucia and Suriname and with it an expansion of their range in the Caribbean today crossed by the sloops of war of the Fourth Imperial fleet.

The hope of the peoples in the South-South connection revived once more the advancement of peoples in the midst of the crisis of civilization imposed by the empire and its allies. The new results from Alba economically with the South Bank,

in trade with the cooperation agreements in Solidarity with the Haitian plan, the network of media and now with the Defence Council member countries Alba reflects the maturity and development of the process that holds promise for our people and takes away more and more plans and recolonization imperial annexation.

The new meeting of Dominica in August will be marked by the passage of Winners of Our Peoples in Alba.
