

PRESS RELEASE

The F.A.R.P. has liberated guns & ammunition in the operation carried out in the Armory on Domenech Avenue. By means of popular war, the Puerto Rican people will win independence and our working class will guide it towards socialism. For this it is necessary to obtain modern equipment in good condition that will let us fight effectively against the yankee imperialists. The imperialist bourgeoisie and their dirty junior partners have enormous material & economic resources of all types to repress the working people & keep themselves in power. The working class & the people in general do not have the economic resources necessary to supply their needs against the enemy. Moreover, the workers have created this wealth & these resources that imperialism has appropriated & uses to continue its exploitation. The people have the right to take what they have made with their sweat - what they need now for their liberation. We carry out this appropriation in their name in order to fill one of the needs of the revolution. It is only a logistical operation like those we have carried out in the past & will have to realize in the future.

The F.A.R.P. believes firmly that the people will make the revolution & that they must sustain it with their own efforts. We do not wait for external resources although we know that our struggle can depend on international solidarity, above all from other people in struggle. Faithful to our principles, we are totally committed, **in practice**, to the development of the political-military organization, & to provide what is needed, economically & materially, for the development of the armed struggle. The working class, the working people, have the human resources to form the fighters and the combat units necessary to the struggle; among them we look for these. The enemy has the necessary logistical resources, from them we seize what we need. At this stage, our forces are moving forward with political work among the masses- that of denouncing the enemy and on the necessity of the struggle for independence; & the organizational work, the spirit of the combatents and actions of a logistical nature.

Let us go on the road that Albizu & Betances have shown us. Go and salute the heroic, patriotic act of Jayuya, in honor of Dario Rosada and Soto Arrivi & as a response to the annexationist primaries.
